WEB DEV EXPERIENCE

Skills & techonolgies:

Ruby, Ruby on Rails, HTML, CSS, JavaScript, AngularJS, jQuery, Git, Bootstrap, Heroku

Projects:

- **KGO - Kolezenska Gielda Ostrokołowa**

kagieo.pl - github.com/piokaczm/kgio

It's a RoR app created to fix the mess with the fixed gear bike parts trading - specialized marketplace which aggregates relevant data and aims to make the process of seeking and purchasing much simpler.

Main technologies: RoR, Minitest, Bootstrap, SendGrid, Heroku

- **Portfolio**

piotrkaczmarczyk.pl - github.com/piokaczm/personal-site

The site which let you know me a bit better - it's not about work related stuff and web-dev projects only, but also about who I am, my passions. Mobile version available in the near future.

Main technologies: AngularJS, HTML, CSS, Heroku, Karma, Protractor

- **GYST (work in progress)**

github.com/piokaczm/gyst

An app in development - made to learn how to make RoR backend and AngularJS frontend work together, to get deeper understanding of mailers, scheduling tasks, using non-ActiveRecord classes in an app, as well as to learn basics of RSpec, Capybara, and Factory Girl.
